

■ Output Control Function

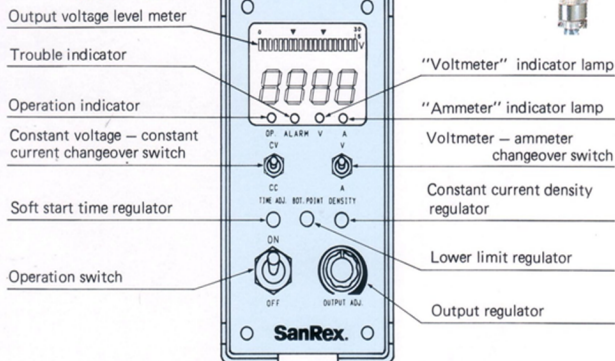

Features of the remote control box (MRT series)

- 1 Compact and light. (about 400 g)
- 2 Figures are displayed in Sansha's own digital form; either voltage or current (switched over) can be properly monitored. Output voltage is displayed at the uppermost LED level meter so that the rectifier's operation status can be visually monitored.
- 3 All the particulars are arranged on the operation section; operation indicator, trouble indicator, VCD manipulator necessary for plating control (constant voltage, constant current, constant current density).
- 4 Either standing type or console type can be manufactured at customer's request.

Names of parts

- A 10-meter cable is attached (it can be extended up to 30 meters).
